

Summary

Computer Engineering graduate with hands-on experience building responsive, performance-focused web and mobile applications using React.js and modern JavaScript ecosystems. I design user-centric front ends, work effectively in Agile teams, and prioritize maintainable code and measurable performance improvements. Currently focused on React Native mobile development and publishing practical utility apps.

Core Skills

- Frontend: React.js, React Native, Redux, Tailwind CSS, SASS/SCSS, HTML5, CSS3
- Backend & Tools: Node.js, REST APIs, Git, Agile/Scrum
- Practices: Responsive design, performance optimization, component-driven development
- Languages: Turkish (native), English (B2)

Experience

- Software Engineer Intern — Strajedi

Istanbul · Jul 2023 – Aug 2023

 - Built responsive, high-performance UIs with React.js; applied DOM optimization techniques.
 - Implemented scalable styles with SASS/SCSS using component-driven architecture.
 - Collaborated with UX/UI teams to translate requirements into interactive features.
 - Actively participated in Agile ceremonies and peer reviews.
- Frontend Developer Intern — hub.studio

Istanbul · Jul 2022 – Aug 2022

 - Developed interactive features using React.js, Redux and modern JavaScript patterns.
 - Created reusable UI elements with Tailwind CSS to improve maintainability.
 - Integrated RESTful APIs for real-time updates.
 - Collaborated with designers and engineers during sprint cycles.

Education

Istanbul Medeniyet University — B.Sc., Computer Engineering (Oct 2019 – Jun 2023)

Certifications

- Applied React.js
- Redux Training (2023)
- Frontend Web Development — Beginner Path
- Java Programming: Introduction 1 & 2
- English Certificate — Upper-Intermediate (B2)
