# HASAN SEMIH AKTAŞ

**Mobile & Full-Stack Developer | React Native**

Istanbul, Turkey +90 530 487 79 11 hsemihaktas@gmail.com linkedin.com/in/hsemihaktas github.com/hsemihaktas
hsemihaktas.vercel.app

## PROFESSIONAL SUMMARY

Results-driven Mobile & Full-Stack Developer with 3+ years of hands-on experience delivering production-ready cross-platform applications using **React Native**, **TypeScript**, and **Expo**. Proven track record of shipping AI-powered mobile apps to App Store and Google Play with active user bases. Deep expertise in **Generative AI integration**, **LLM APIs**, **computer vision**, and **serverless cloud architecture**. Adept at leading end-to-end product development from system design to CI/CD deployment. Passionate about clean architecture, performance optimization, and crafting exceptional user experiences with modern UI/UX patterns.

## TECHNICAL SKILLS

**Mobile Development:** React Native, Expo SDK 52+, React Navigation, iOS & Android Native Modules, EAS Build/Submit, App Store Connect, Google Play Console, Push Notifications, Deep Linking
**Frontend:** React.js, Next.js 16 (App Router), TypeScript, JavaScript (ES6+), Redux Toolkit, Zustand, TanStack Query, Framer Motion, TailwindCSS 4
**Backend & Cloud:** Node.js, RESTful APIs, Firebase (Auth, Firestore, Functions), Supabase (Edge Functions, RLS), PostgreSQL, Serverless Architecture
**AI/ML & GenAI:** Google Gemini API, On-Device ML, TensorFlow Lite, Computer Vision, Image Processing, LLM Integration, Prompt Engineering
**DevOps & Tools:** Git, GitHub Actions, CI/CD Pipelines, Fastlane, Sentry, Vercel, Docker, Analytics (Firebase, Mixpanel)

## PROFESSIONAL EXPERIENCE

**Mobile Developer & AI Application Specialist — Repack Studio** *Aug 2023 – Present*

- Lead end-to-end development of cross-platform mobile apps using React Native and Expo, targeting iOS and Android with shared codebase architecture and 95%+ code reuse.
- Architected and shipped **"Effease – AI Photo Studio"** integrating Google Gemini 2.5 Flash for real-time AI image transformation; available on App Store & Google Play.
- Implemented GenAI features leveraging computer vision APIs and LLM-powered prompt engineering for intelligent photo enhancements and style transfers.
- Built scalable state management with Zustand and TanStack Query; integrated Supabase with Row-Level Security for real-time database, authentication, and edge functions.
- Managed full release cycle using EAS Build/Submit with automated CI/CD via GitHub Actions; reduced deployment time by 60%.
- Developed marketing websites for mobile products using Next.js and TailwindCSS with server-side rendering and SEO optimization.

**Frontend Developer — Strajedi** *Jan 2023 – Aug 2023*

- Developed high-performance web applications using React.js, TypeScript, and Next.js with server-side rendering (SSR) and static site generation (SSG).
- Optimized Core Web Vitals (LCP, CLS, INP) through code splitting, lazy loading, and efficient component memoization; improved Lighthouse scores by 35%.
- Built reusable component library following atomic design principles with Storybook documentation and comprehensive unit testing with Jest and React Testing Library.
- Collaborated with UX/UI team in Agile/Scrum sprints; participated in code reviews, technical planning, and sprint retrospectives.

**Frontend Developer — hub.studio** *Mar 2022 – Dec 2022*

- Built interactive single-page applications using React.js and Redux for complex state management; migrated legacy jQuery codebase to modern React architecture.
- Integrated RESTful APIs and WebSocket connections for real-time data synchronization and live collaborative features.
- Implemented responsive UI with Tailwind CSS; ensured cross-browser compatibility, accessibility (WCAG 2.1), and mobile-first design approach.
- Developed custom hooks and utilities to improve code reusability; reduced bundle size by 40% through tree-shaking and dynamic imports.

## FEATURED PROJECTS

- **Effease – AI Photo Studio** [Web | iOS | Android]
  Full-stack mobile app with Google Gemini AI for intelligent photo editing. Features 50+ AI transformation effects (Anime, Cyberpunk, Artistic), token-based credit system, and Firebase Auth integration. Built with React Native, Expo, TypeScript, and Supabase.
- **FaceRateMax AI**
  Cross-platform mobile app utilizing TensorFlow Lite for on-device facial analysis and scoring. Implemented computer vision algorithms for real-time face detection without server dependency. React Native, Expo, Firebase.

- **Task Flow – SaaS Task Management** [Live Demo]
  Full-stack Kanban-style task management platform with role-based access control (Owner, Admin, Member), drag-and-drop interface, and real-time collaboration. Next.js, Supabase, PostgreSQL, TailwindCSS.
- **E-Commerce Multi-Vendor Platform** [Live Demo]
  Full-stack e-commerce solution enabling merchants to create stores, manage products, and track orders. Features real-time analytics, inventory management, and low-stock alerts. Next.js, TypeScript, Firebase Firestore, TailwindCSS.
- **ALT F5 – Digital Collective Platform** [Live Demo]
  Cyberpunk-themed digital media platform featuring full-screen comic reader, podcast hub, and indie game arcade. Keyboard/touch navigation, parallax effects, and SEO-optimized with dynamic metadata. Next.js 16, Zustand, Framer Motion, TailwindCSS.
- **Loki History – Interactive Mythology Website** [Live Demo]
  Cinematic web experience exploring Norse mythology with interactive genealogy tree, artifacts section, and immersive parallax storytelling. Next.js 16, TailwindCSS 4, custom animations.
- **The Void – Cosmic Experience** [Live Demo]
  Space-themed scientific exploration website featuring vacuum energy, time dilation, and cosmic void content. Framer Motion animations, responsive design, and dark cinematic UI. Next.js, TypeScript.
- **Beauty Center Booking App** [GitHub]
  Mobile booking platform for beauty services with real-time availability, push notifications, and appointment rating system with photo uploads. React Native, Expo, TypeScript.
- **Encrypt Diary** [GitHub]
  Privacy-focused note-taking app with AES-256 encryption using expo-crypto. Secure CRUD operations with key-based access control. React Native, Expo.
- **BlurFace – AI Privacy Tool** [GitHub]
  AI-powered face detection and blurring application for images and videos using OpenCV. Real-time processing with adjustable blur intensity. Python, Django, Computer Vision.

## EDUCATION

**B.Sc. in Computer Engineering**
Istanbul Medeniyet University, 2019 – 2023 / GPA: 3.21/4.00

## LANGUAGES

**Turkish:** Native | **English:** Intermediate (B1)
